Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, 23-58 and 60-63, drawn to a method, classified in class 117, subclass 13.
- II. Claims 11-22, 59 and 64-70, drawn to an apparatus, classified in class 117, subclass 200.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used in another materially different process, such as one where crystalline ribbon is not pulled from the melt. For example, the apparatus can be used in a process, where it is used solely to melt a raw material or used in a process to form non-crystalline ribbons.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
